

Northwind Therapeutics, Inc.

Organisation & Headcount Review - FY2025

Northwind Therapeutics is a PE-backed specialty pharmaceutical business with FY2025 revenue of \$480M. Total headcount is 1,150 FTE, of which 260 sit in general & administrative functions. G&A cost of \$96M represents 20.0% of revenue.

The principal driver of G&A intensity is acquisition history. Three bolt-on acquisitions have completed since 2021 - Calder Pharma (2021), Deveron Labs (2023) and Lyle Specialty (2024). None has been functionally integrated. Each retains its own finance, human resources, regulatory affairs and IT organisation, reporting into the parent only at the CFO and General Counsel level.

G&A headcount by function and legal entity

Function	Parent	Calder	Deveron	Lyle	Total
Finance & accounting	34	14	11	9	68
Human resources	18	8	7	5	38
Information technology	26	12	9	7	54
Regulatory affairs	22	9	8	6	45
Legal & compliance	14	4	3	2	23
Executive & corporate	20	5	4	3	32
Total G&A FTE	134	52	42	32	260

Four separate month-end close processes run in parallel. Consolidated close takes 16 working days against a sponsor target of 8. Finance leadership estimates 40% of Calder, Deveron and Lyle finance activity duplicates work already performed by the parent shared-service team in Raleigh.

Constraints

Deveron Labs employees in Ohio are covered by a works agreement requiring 60 days' consultation before any role reduction. The Lyle Specialty acquisition agreement contains a retention undertaking preventing involuntary reduction of named regulatory staff before 31 December 2026.
