

Northwind Therapeutics, Inc.

IT Systems Landscape & Integration Status

Northwind operates three separate ERP instances, a consequence of the acquisition programme. No single source of truth exists for vendor master, chart of accounts or employee records.

System	Entity	Users	Annual cost \$	Status
SAP ECC6	Parent + Calder	640	3,200,000	Core, EOL 2030
NetSuite	Deveron Labs	210	1,150,000	Standalone
Microsoft Dynamics	Lyle Specialty	140	820,000	Standalone
Workday HCM	Parent only	1,150	1,400,000	Partial rollout
3 separate payroll systems	All entities	n/a	610,000	Not consolidated
Veeva Vault (x2)	Parent, Deveron	380	940,000	Duplicated

A single-ERP consolidation has been scoped twice, in 2022 and 2024, and deferred both times in favour of commercial priorities. The 2024 estimate was \$14M over 26 months. Vertice IT Managed Services bills separately for support of each instance.

Two Veeva Vault tenancies run in parallel because the Deveron regulatory team was never migrated. Licence overlap is estimated at 140 seats.
