

Northwind Therapeutics, Inc.

Commercial Operations Review - FY2025

Sales & marketing cost of \$67.2M represents 14.0% of revenue, with advertising and promotion a further \$26.4M (5.5%). Northwind fields a 140-representative field force across three marketed brands.

Brand	Revenue \$M	Field reps	A&P \$M	Territory overlap
Cardiolex	214	62	11.8	Baseline
Renvia	158	48	9.1	71% with Cardiolex
Osteban (Lyle)	108	30	5.5	64% with Cardiolex

All three brands call on overlapping cardiology and primary-care prescriber lists. Territory analysis completed in Q3 FY2025 found that 68% of target prescribers are covered by two or more representatives from separate brand teams, each with its own reporting line, CRM configuration and incentive plan.

The Osteban field force was inherited with the Lyle Specialty acquisition and has not been merged into the parent commercial organisation. It operates on a separate Veeva CRM instance.

Growth context: two late-stage pipeline assets are expected to file in FY2027. The sponsor is targeting an exit in 2028, and commercial leadership has resisted field-force reduction on the grounds that launch capacity must be preserved.
